NEWSPAPER

TRASH TO TREASURE

WELCOME TO 3T VIENNA

As our Erasmus project continues unfolding in Vienna, we welcome everyone into 3T: Trash to Treasure, a collaborative experience focused on sustainability, creativity, and cultural exchange. Together, we explore pollution challenges, rethink waste, and develop solutions that inspire meaningful environmental action across our diverse group.

PROGRESS THROUGH SHARED LEARNING

Through workshops and cultural exchange, we deepen our awareness of pollution, sustainable habits, and creative recycling. Every activity reinforces cooperation and proves how small changes can create real impact when young people work together with intention and motivation.

PARTICIPANTS IN ACTION

Forty-two participants are actively collaborating, sharing ideas, and developing solutions that transform waste into useful, sustainable resources. Through teamwork, creativity, and hands-on activities, everyone is contributing to practical, long-term strategies that promote environmental awareness and meaningful action for a cleaner, greener future.

CORE THEMES

Throughout the project, we explore environmental topics that build awareness and responsibility. From identifying pollution sources to learning sustainable habits, each activity fosters reflection, cooperation, and practical understanding. These moments guide participants toward meaningful action for a healthier planet.

PROJECT ACTIVITIES SO FAR

Country presentations allow teams to explain pollution issues and solutions from their nations. The drama workshop encourages participants to imagine Eco-Futures and explore life twenty years ahead. During the NGO Fair, organisations share successful initiatives. Hands-on recycling tasks build practical skills and inspire creative ways to transform discarded materials into something useful.

IMPACT BEYOND VIENNA

This Erasmus project motivates participants to apply new skills and knowledge at home. By sharing sustainable habits, inspiring peers, and promoting responsibility, each person supports environmental improvement and encourages their community to participate in actions for planet.
